Dec 7 1895

How Supt U S Mint
Philadelphia Pa
Dear Sir.

I this day mail you
1 sample of ore that is said
to contain a large percent of aluminum.
Will you please test the sample for
me and tell me what it contains.

If this does contain aluminum
please tell me the value of it and also
tell me where I can market the
ore. I have an inexhaustible amount
of the ore. Give me the address
of some firm with whom I can
correspond regarding it.

Is there a ready sale for this class
of ore. Trusting that I may be favored
with your early reply and also saying
that contains a liberal part in alum.

I remain,

Very Truly
H H Kidder

Destiny, Mexico,
Dec. 7/95

H. H. Kiddle

Seals, Sample

of ore, containing
Aluminum for testing &
information as to value &
where can such sales or
compared with previous
values in Aluminum.

Am. "Pittsburg Reduction Co."

Mint of the United States at Philadelphia

Assayer's Department

189

Sample appears to contain some
Alumina. Do not think

however, it would pay to work

Beauxite is the mineral
that is worked very extensively
for Aluminum; as the percentage
of Alumina in said mineral is
high. -

Would refer you to the
Pittsburgh Reduction Co.
Pittsburgh Penna. -
